Non-Final Office Action

Acknowledgement is made of the response and amendments filed July 11, 2005. Claims 1-9, 12-30, and 33-41 are pending. Amendments are entered. No claim is allowed.

The previous rejections are withdrawn as claims are amended and arguments are found persuasive.

Claim Rejections - 35 USC § 103 – First Rejection

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

Art Unit: 1616

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-9, 12-30, and 33-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over SORENSON et al (US Patent 6,572,843).

SORENSON et al teaches a method for relaxing (or "lanthionizing") keratinous fibers of the hair. The reference teaches permanent waving processes typically use substances based on thioglycolates, whereas permanent hair straighteners (also known as "relaxers") normally require more aggressive reducing chemicals, e.g., hydroxides, in order to achieve "permanent", straightening. See the entire document, especially lines 20-67 in col. 1, lines 1-62 in col. 2, examples, and claims.

Instant claims differ from the reference in claiming more specific steps.

One skilled in the art at the time of invention would have been motivated to prepare a method of relaxing keratinous fibers of the hair using thioglycolates with the expectation of success because SORENSON et al teaches the same method.

A reference is good not only for what it teaches by direct anticipation but also for what one of ordinary skill might reasonably infer from the teachings. *In re opprecht* 12 USPQ 2d 1235, 1236 (Fed Cir. 1989); *In re Bode* 193 USPQ 12 (CCPA 1976). A reference is not limited to working examples. *In re Fracalossi* 215 USPQ 569 (CCPA 1982).

Art Unit: 1616

Accordingly, the burden of proof is upon applicants to show that instantly claimed subject matter is different and unobvious over those taught by prior art. See *In re Brown*, 173 USPQ 685, 688; *In re Best*, 195 USPQ 430 and *In re Marosi*, 218 USPQ 289, 293.

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that the subject matter defined by the instant claims would have been obvious within the meaning of 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 103 – Second Rejection

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Claims 1-9, 12-30, and 33-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over PETROW (US Patent 4,659,566).

PETROW teaches methods of permanently waving keratinous fibers, particularly hair, and compositions of matter useful in these methods. PETROW also teaches compositions and methods useful for altering the shape of hair by relaxing or straightening naturally or artificially waved keratinous fibers, particularly hair. PETROW teaches that the reduction stage, the first stage of the method, the disulfide linkages (S--S) of the keratin fiber are opened with the aid of reducing agents, including thioglycolates, sulfites, and bisulfites, etc. See the entire document especially lines 45-67 in col. 1, lines 1-29 in col. 2, examples, and claims.

Instant claims differ from the reference in claiming more specific steps.

One skilled in the art at the time of invention would have been motivated to prepare a method of relaxing keratinous fibers of the hair using thioglycolates with the expectation of success because PETROW teaches the same method.

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that the subject matter defined by the instant claims would have been obvious within the meaning of 35 U.S.C. 103(a).
